1. Login system:

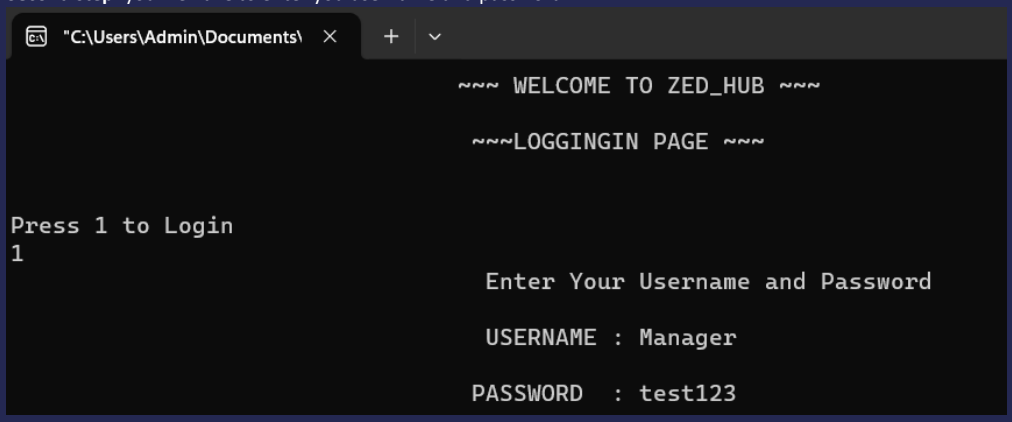

Note:

In order to gain access to the system the user is required to enter the programed username and password in the source code. According to their respective roles in the organization.

The manager and coordinator attains the privilege to operate from the main menu environment.

First step: begins by pressing 1 to affirm for logging in.

Second step: you we have to enter you username and password.

When password and username are both correct you will be signed in to the respective environment that match's you role in the organization and when either of the two is wrong or both are wrong, you will be required to re-do the process again following the steps like before until access is granted.

Now when access has been granted as a manager / coordinator you will move to the following activities.

2. MAIN MENU

2.1 ADDING INNOVATOR.
Under this option you will be required to press options one(1) of the main menu to be able to add innovators and you be asked to enter their details (first name, surname, NRC/passport No, Age, Title of Innovation, Date of Submitted, Patent Status [patented, in progress and not required] and Innovation Category[IT, wood-tech, metal-tech and food-tech]).

2.2 DELETING INNOVATOR.
To delete you will be required to choose option two (2) then you will be required to enter the NRC/passport number in order to delete innovator of choice whose NRC/passport number must be already in the system. Once deleted successfully it will auto take you back to the main menu page with and when details entered are invalid it will still take you back to automatically but with an error massager.

2.3 SEARCH FOR INNOVATOR.
To be able to search for innovator you are required to choose option three (3) then like under option two you are also required to provide the NRC/passport number to be able to access innovator you intend to search for and when the provide credentials don't match any in the system it will auto take you back to main menu an d output error massage. And details match those in the system it will display the all details of innovator, later requires you to press one (1) to go back to main menu.

2.4 EDIT INNOVATOR RECORDS.
In order to be able to edit innovators records press option four (4) of main menu therefore, you be asked to provide the NRC/passport number in order to edit record of innovator choice. If wrong details are provide it will once more auto return you back to the main menu with an error massage? And when correct details are provided you will be required to reedit everything under the innovator of choice when done successful massage will be displayed and automatically take you back to main menu .

2.5 DISPLAY INNOVATOR BY INNOVATION CATERGORY.
To display innovation category you are to select option five (5) of main menu and you are required to enter category of innovators innovation whether (food-tech, wood-tech, metal-tech or IT). When providing this details be specific of the exactly details provided early in the system to get the desired output when the output is favorable it will display innovator. To exist you will enter one (1) to go back to main menu. And the provided information is wrong it well terminate and ask to input one (1) to return back to main menu.

Commented [A1]:
